- **Four Pillars of Qatar National Vision 2030 and Implications for NIA**

The QNV 2030 rests on four key pillars, each with specific implications for NIA:

- **Human Development:** This pillar focuses on developing all people to sustain a prosperous society. NIA strives to provide a world-class education that equips our students with the skills, knowledge, and values necessary to succeed in a knowledge-based and competitive global environment. We therefore ensure that our curriculum aligns with the future needs fostering critical thinking, creativity, and innovation, while instilling a strong sense of Qatari identity and ethical values. This aligns with our school objective of fostering well-rounded, globally-minded students prepared to contribute to Qatar's future. NIA continues to invest in teacher training and professional development to ensure our educators are equipped to deliver a high-quality, future-focused education.
- **Social Development:** This pillar emphasises building a just and caring society based on high moral standards. NIA plays a crucial role in fostering these values among our students, promoting tolerance, benevolence, and constructive dialogue within the school community and beyond. We also ensure a safe, secure, and stable learning environment for all students. Furthermore, NIA actively promote Qatari national heritage, Arab and Islamic values, and identity. NIA's social emotional learning programmes are aligned with the Qatari context.
- **Economic Development:** This pillar aims to develop a competitive and diversified economy. NIA contributes by preparing students to be future leaders and entrepreneurs, equipped with the skills necessary to drive economic growth and innovation. Emphasis on STEM education and developing entrepreneurial skills is crucial. NIA continues to develop partnerships with local businesses to provide students with real-world learning experiences.
- **Environmental Development:** This pillar focuses on managing the environment sustainably. NIA continues to educate students about environmental issues and promote responsible environmental practises. This can be integrated into the curriculum through projects and initiatives that encourage students to be environmentally conscious citizens.

Newton Group Values:

Regulatory Environment and NIA Operations

NIA operates under the regulatory environment established by the Qatari government, including the Ministry of Education and Higher Education. Our licence to operate is regularly renewed, granted by Ministry of Education and Higher Education valid until 7th December 2026 and is subject to specific regulations and guidelines. These regulations influence our curriculum, staffing, facilities, and operational procedures. NIA maintains formal relationships with the French Embassy, Qatar International Universities, Sport Federations, Earthna, ThiMUN and Qatar Debate which supports our international programmes and cultural exchange initiatives. We are committed to adhering to all Qatari laws and regulations to ensure the continued success and sustainability of NIA

Conclusion

Qatar National Vision 2030 provides a clear framework for the nation's future development. By aligning NIA's guiding principles and strategic plan, we can ensure that our school is contributing to Qatar's long-term success. Continued adherence to the regulatory environment and a focus on delivering a world-class education that prepares students for the challenges and opportunities of the future are essential.
