Learning Through Purposeful Play in EYFS

EYFS came alive during Superhero Colour Day, where purposeful play was used to develop learning through exploration, movement and imagination. Hands-on colour investigations encouraged curiosity and early scientific thinking, while physical challenges developed coordination, balance and confidence. Collaborative missions promoted communication, teamwork and problem-solving, with music, movement and imaginative play providing further opportunities for self-expression.

The experience demonstrated how carefully planned, engaging contexts can support learning across the EYFS curriculum, enabling children to develop communication, creativity, physical skills, confidence and social interaction through meaningful shared experiences.

CPD This week

Our school prides itself on inclusive practice and the quality of provision for our Wave 2 and Wave 3 children. This week, Ms Hickman led training on how Learning Pathways help teachers identify specific barriers to learning and set clear, achievable individual targets. Most importantly, these plans help teachers adapt teaching, resources and support within the classroom, enabling children to work alongside their peers, participate fully in class learning and develop greater independence. It is about providing the right support, at the right time, without making children feel different or separated from their class.

Student Leadership

We are delighted to announce our Student Leadership Team for this academic year following a thorough voting and interview process.

Congratulations to our new Head Boy, Jassim Al Blooshi, and Head Girl, Doaa Waqqas. We look forward to seeing them represent the student body, demonstrate leadership and make a positive contribution to our school community throughout the year.

News and Updates

Parent Workshops

It was wonderful to see such a strong turnout for our Parent Maths Workshop during Maths Week. Parents explored the approaches we use to teach Maths, how they can support learning at home, and how Century Tech provides personalised learning and targeted practice. Building a shared understanding between home and school is an important part of supporting children's confidence, engagement and progress in Maths.

Year Group Collaboration

As part of Maths Week, our KS3 students took part in a fantastic cross-year collaboration with younger students. They worked alongside them to support and guide them through a range of engaging maths tasks and activities.

This was a great opportunity for our older students to develop their communication, teamwork and leadership skills while helping younger learners build confidence in mathematics. It was wonderful to see students working together, sharing ideas and enjoying maths across different year groups.

Stars of the Week

Tara Phillips - Year 5 Showing determination and flexibility while putting children at the center of her classroom.

Ms Tess EYFS TA - Stepping in when she was needed to cover her class for the week!

Team of the Week - Our Nurses - Our caring superheroes!
